

» Paperless transportation execution through digitalization – efficient, transparent and sustainable.

Our driver app automates, digitizes, and optimizes business processes for the highest service quality. Annually, we save up to 1.5 million sheets of paper and make our transport chains even more sustainable. We're on a climate course – come along!

» Benefit from the advantages:

» Track & Trace & Transparency:

Real-time notifications regarding loading units for customers, loading points, and dispatch - for increased transparency and predictability.

» Accelerated processes:

Elimination of manually filling out paper documents and their physical distribution speeds up the entire process from receipt to dispatch.

» Efficiency enhancement:

Minimization of manual workflows and errors in data entry for a more efficient processing and documentation of orders for – precise and reliable information.

» Delivery confirmations to desired recipients

The digital signature allows for immediate dispatch of the documents via email to a freely selectable recipient group.

» Real-time information flow:

Real-time communication between driver, customer and dispatch.

» Sustainability:

The elimination of paper reduces resource and administrative overhead and decreases the ecological footprint of the supply chain. A manual driving order requires up to 5 pages of paper.

» Increased productivity:

Reduced waiting times through early notification of the shipment at the loading point and minimization of empty and incorrect trips for fuel savings. Automated document management eliminates manual filing.

» Compliance and legal certainty:

Data manipulation excluded: transparent, digital order archiving ensures security, integrity, and straightforward data management.
